Full Stack Developer with 1+ years of hands-on experience designing, developing, and implementing applications and solutions using a range of technologies and programming languages. Seeking to leverage broad development experience and hands-on technical expertise in a challenging role as a Full-stack Developer.

PROJECTS

Expat Journal

[GitHub](#)

Jun 2020

An app designed to see photos laid out in a grid. Users can create, read, update and delete stories and photos.

HTML | React | Redux | Node | CSS

- Developed web-app using React, Redux, HTML5/CSS3 that provides a professional platform for expats to share their experiences globally.
- Worked across the software development cycle to gather user requirements and build and maintain the code, which allows users to post descriptions and stories about their travels.
- Ensure application successfully establish connection between frontend and backend.

How-To App

[GitHub](#)

Jan 2021

An app designed to solve unknown problems, where user can view, update, add and delete instructions, required to solve problems. This app is similar to YouTube app, which we commonly use to solve our daily life problems. How-To-App provides written instructions.

HTML | React | Redux | Node | CSS | Knex | SQLite3 | REST API Services

- Works as a website guide to complete a task.
- It provides user knowledge and resources in order to provide guides.
- Ensure applications security and ability to interact with multiple APIs and databases.
- Responsible for API design and development of RESTful services.

Secret Family Recipe App

[GitHub](#)

August 2020

An app designed to save and preserve cooking recipes digitally for family access. It also helps in creating catalogue of recipes and storing them in private accounts.

HTML | React | Redux | Node | CSS

- Use my extensive experience with front end development to define the structure and components for the project, making sure they're reusable.
 - Responsible for the implementation of Web Design based on CSS3, HTML5, Bootstrap, React JS.
 - Implemented ReactJs to create a dynamically changing website.
-
